

PVC & STAINLESS STEEL FRAMED AIR INLET LOUVERS

CL-146 frames are constructed from UV stabilized PVC and the CL-146-SST Frames are constructed from 304 Stainless Steel. The Cellular Inlet Louver material is constructed of UV-stabilized PVC. This compound has outstanding resistance to weather exposure and is nearly impervious to chemical degradation by alkali, acids, greases, fats, oils, and biological attack. It also has an excellent fire rating due to its self-extinguishing characteristics, and meets or exceeds Cooling Tower Institute Standard 136.
